William Johnston & Company Limited have supported the UK water utilities market since 1946 and supplied millions of WRAS approved EPDM flange gaskets over the years to virtually every Water Authority in the UK and for projects throughout Europe and as far afield as China and Brazil.

As our customer base has grown so has our WRAS approved range of products to support the demands of the large number of pipeline, pump, valve and steel fabrication companies we supply. Gaskets to cover higher pressures are available in any standard flange pipe size and special sizes are manufactured at either our Glasgow or Inverness branches.

We are one of the largest UK fastener stockists supplying specialist WIS/WRAS and gas industry coated gasket/bolt sets to the UK pipeline industry water authorities, national and international customers alike.

We are a service-focussed organisation, which understands customer needs, meets their requirements and strives to exceed their expectations. We have a process approach in accordance with ISO 9001:2008 and review its effectiveness at regular intervals as continuous improvement is a permanent management objective. Full technical backup is available on any of our products.

Always eager to assist with new products or innovative ideas, William Johnston & Company Limited is a single source supplier for your sealing requirements.
