Novus 30 is a good quality compressed sheet material based on a blend of aramid and inorganic fibres with a nitrile rubber binder system.

Service
Novus 30 is a general purpose material suitable for use in a wide range of applications, including hot and cold water, steam, oils, fuels, gases and a wide range of general chemicals.

Approvals / Compliance
DIN–DVGW (Gas Industry) 93.01–e–845
WRAS Potable Water:
Registration No. IS0515
Complies with BS Specification 7531 Grade Y

Availability
Thickness range: 0.4mm to 6.0mm
Standard sheet sizes: 2.0m x 2.0m
2.0m x 1.5m
2.0m x 1.0m
1.5m x 1.5m
1.5m x 1.0m
Standard roll sizes: Up to a maximum size of 6.0m x 2.0m
Available with fine mesh mild steel reinforcement: Novus 30 Metallic or gauze mild steel wire reinforcement: Novus 30 GWI
It can also be supplied with anti-stick coating and graphite coating.

Physical properties

- **Thickness**: 1.5mm
- **Density**: 2.0g/cc
- **Tensile Strength**: ASTM F152 12MPa
- **Compression**: ASTM F36 9%
- **Recovery**: ASTM F36 50% min
- **Residual Stress**: BS 7531 (300°C)
  - DIN 52913 23MPa
  - DIN 52913 29MPa
- **Gas Leakage**: BS 7531 <1.0cc/min
- **ASTM Oil 1**: Thickness increase 2.0%
- **IRM 903 Oil**: Thickness increase 5.0%
- **ASTM Fuel B**: Thickness increase 4.0%

Novus 30 Pressure/Temperature Limits

As the company’s products are used for a multiplicity of purposes and as the company has no control over the method of their applications or use, the company excludes all conditions or warranties, expressed or implied by statute or otherwise, as to their products and/or their fitness for any particular purpose. Any technical co-operation between the company and the customer is given for customers assistance only, and without liability on the part of the company.

1. Suitable subject to chemical compatibility.
2. Suitable in some cases but check your application requirements with Flexitallic.
3. Contact the Technical Team for applications with higher temperatures and pressures. Applicable to 1.5mm and below.

The operating temperature of non-asbestos sheet material is related to the thickness of materials selected. Thinner materials give better temperature and pressure properties.
