# Stuffing-Box-Packing Type 2127

## **Material composition**

Diagonally braided from acrylic fibre, impregnated throughout with PTFE-dispersion, lubricated with silicone oil.

Please note: the colour of the actual product might vary from the image on this data-sheet.

### **Properties**

Style 2127 is a dense, yet soft and pliable packing . The combination of the synthetic fibres, the PTFE-impregnation and the high-temperature break-in lubricant results in a packing with very low shaft wear and outstanding durability.

### **Application areas**

Multi-purpose packing which can be used in pumps, mixers, kneaders and valves in the chemical, pharmaceutical, pulpand paper and food industry.

## **Application media**

TEADIT style 2127 covers a wide variety of media like water, steam, diluted acids and lyes, most chemicals, gases, etc.

#### Not suitable for

Concentrated acids and lyes, oxygen, lacquers and paint.

#### **Benefits**

Excellent all-round packing for many applications within a plant. Non contaminating, not shaft scouring. WRC approval.

Temperature:

- temp + temp (°C) 100 230

Pressure:

rotating: reciprocating: static: (bar) 20 80 100

pH: 2-12 density: 1,35 v: (m/s) 12

### **Approval**
