PSI Kompakt-Seals

General Information

The Sealing System

The new PSI sealing system COMPAKT is the perfect complement to our Link-Seal® modular seal. It offers ideal sealing for wall opening of gas, water and sewage pipes as well as for cables. The COMPAKT seal is a pressure tight system. Pressure plates made of stainless steel.

Description

The 40 mm wide rubber element is compressed by means of two metallic discs. The PSI COMPAKT seals the annular space between the carrier pipe and the casing pipe or the core drilled hole against water or gas.

Kompakt Varia 1.5

The COMPAKT Type Varia 1.5 is a flexible sealing system which can be used either as a blind seal or as a seal for pipes e.g. cables from O.D. 18 up to 65 mm. The "onion ring technology" allows small steps of 5 mm and therefore ensures a perfect tightness.

Accessories

PVC, Steel and asbestos-free fibre cement sleeves, KB epoxy resin.

PSI Kompakt-Seals

Installation Instructions

Each sealing consists of one rubber element, 2 pressure plates and the corresponding number of bolts and nuts.

Clean the wall sleeve, core drilled hole, carrier pipe or cable. We recommend to coat core drill with epoxy resin.

Push the PSI COMPAKT into the sleeve or core drilled hole and push the carrier pipe through. If the carrier pipe is already installed please use our divided version

Start to tighten the nuts clock wise with a torque wrench. Giving each nut 2-3 turns. Repeat procedure after two hours.

Note:

Make sure that you have access to the nuts for eventual re-tightening.

max. torque moment	bolts
5 Nm	M6
10 Nm	M8
15 Nm	M10
20 Nm	M12

PSI Kompakt Varia 1.5

Installation Instruction

To peel off the onion rings push the rings backwards and cut with a sharp knife. Pull off the ring by hand.

1

Push out the centre plug

2

Push the onion rings

3

with a screw driver backwards

4

Slightly cut the remaining rubber

5

and pull away the onion ring

Example:

For a carrier pipe O.D. 32 mm take off the centre and three additional onion rings of 5 mm. The new opening of 35 mm I.D. is now suitable for your carrier pipe of 32 mm O.D.
